

Weekday Astronomy for Lifelong Learners at RMSC Strasenburgh Planetarium

Winter-spring 2016

Adult lifelong learners seeking an intellectually stimulating and provocative program blending science, the arts and history are invited to this series of weekday afternoon programs at the RMSC Strasenburgh Planetarium. Not geared for children, each session lasts about an hour, divided between a rich audio-visual presentation and a tour of current stars, planets and constellations using the Planetarium's giant star projector. Attend several sessions and you'll be on your way to becoming an expert on the sky!

Your regular presenters are Steve Fentress, Director of the RMSC Strasenburgh Planetarium, and Paul Krupinski, Planetarium show presenter and proprietor of the Buffalo-based Mobile Dome Planetarium.

Wednesdays at 2pm

- Feb. 24** **Connections: Art, Music, Astronomy**
