

# NIGHT SKY

S T A R S T E N C I L

- **Night Sky Star Stencil™ transforms the ceiling of your darkened room into a dramatic replica of the real night sky** while leaving the lighted room unchanged (no posters or noticeable markings).
- **Accurate and educational!** Stars and constellations are in proper positions with accurate relative brightness. You also get a hand-held Star Map and Constellation Finder that shows the names and locations of hundreds of stars—an entire hemisphere! In addition, the star map is an excellent take-along item anytime you're stargazing outdoors.
- **Soothing and relaxing.** Finally a simple cure for fear of the dark. The peaceful comfort of a starry night inspires a feeling of "connectedness" with the universe. Enhance your sense of peace.
- **Dazzling and romantic.** Guaranteed bedtime fun for everyone.
- **Easy!** Simply affix the stencil to the ceiling or wall and the adhesive won't stain or remove paint or wallpaper. Then paint the stencil holes with the packaged glow-in-the-dark paint and simply remove the stencil. It works on both smooth and textured ceilings!
- **Ready** for the stars to shine? Expose them to normal room light. Turn out the lights and the stars glow, keep glowing brightly, and fade over the next 8 to 12 hours. They can be recharged indefinitely and are unnoticeable in lighted rooms. The 8-foot stencil takes about one hour to apply; the 12-foot takes approximately two hours. **The stencil can be saved and reused.**
- **It's all here!** Your kit contains everything you need. The Night Sky Star Stencil (either 8 or 12 feet in diameter), adhesive, luminous paint, brush, and easy-to-follow instructions.
- **No projectors, no batteries, no black lights needed...**nothing to clutter the room.
